Tree Trail #2

Find Out More

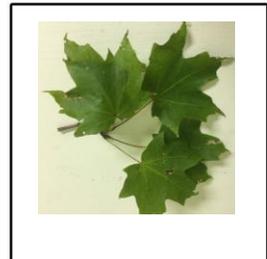

American Beech (*Fagus grandifolia*) It is a slow-growing tree with a lifespan of 150-200 years but can reach 300 years old. Leaves are 3-6 inches long with sharp “toothed” edges. Brown beechnuts are held inside the seed and are eaten by chipmunks and squirrels.

Holly (*Ilex*) A holly tree can live up to 300 years and can be either evergreen or deciduous, losing leaves in the fall. If the trees have “fruit”, it is a female tree. The fruit, mistakenly called berries, are poisonous if eaten by people but can be eaten by birds and other wildlife.

Sugar Maple (*Acer saccharum* Marshall) Sugar maples are used to make commercial maple syrup because of their high sugar content, double the amount of other maples. Wood from the sugar maple is strong is used to make furniture, flooring, and other items.

Sketch your favorite place or thing in the garden

A large, empty rectangular box with a black border, intended for a student to draw or sketch their favorite garden scene or object.

MHHM receives operating support from the W. Parsons Todd Foundation, the New Jersey Historical Commission, a division of the New Jersey Department of State and the F.M. Kirby Foundation and project support from The Astle-Alpaugh Family Foundation, the Garden Club of Morristown and The Rotary Club of Morristown.
